

Using the NH Coastal Viewer to Work with BOB Maps

The NH Coastal Viewer is an online mapping tool with a geographic focus on New Hampshire's coastal watershed communities. Mapping product data layers are accessible for viewing using the NH Coastal Viewer at: <http://nhcoastalviewer.unh.edu/>. Within the online mapping tool, select the "Layers" tab at the bottom of the left side of the screen. Browse through the following **Layers** (clicking "on" each checkbox as you drill down through the folders) to access the data layers referenced in the mapping products:

For the following layers:

- **Flood Storage and Risk Mitigation Opportunity Areas**
- **Buffers for Water Quality Protection**

Go to:

- Environment and Conservation
 - Land Conservation Plan
 - Water Resources Conservation Focus Areas – 2016 Update
 - Flood Storage and Risk Mitigation
 - Pollutant Attenuation

For the following layer:

- **Wildlife Action Plan Habitats within Riparian Buffers**

Go to:

- ❖ Environment and Conservation
 - Wildlife Action Plan
 - WAP 2015: Highest Ranked Wildlife Habitat
(this layer is not limited to the riparian buffers as shown in the maps)
